Asteroid Prophecy SOLLOG – Thee End

00:00  
[Music]

The End is very near

00:11  
Lost all you held dear you didn't

00:19  
want to hear and now you tremble with fear

00:24  
This is SOLLOG the host of thee end

00:34  
my side is SOLLOG .com that's Sol LG

00:39  
.com and thee end is th e e two E's with

00:47  
E and then end en D .com so there's

00:51  
three E's in Thee End .commy academic work

00:55  
you can find at doctor Sol Adoni

01:00  
.com Sol Adoni .com

01:06  
Ithis edition of thee end I'm going to

01:09  
talk about asteroids in my book asteroid

01:15  
which predicts an extinction level event

01:21  
hitting the earth shortly after 2022 if

01:27  
you don't know who I am I'm a

01:29  
world-famous mystic or prophet more

01:33  
accurate than the great Nostradamus my

01:38  
prophecies were distributed online to

01:42  
prove the accuracy of my work from 1995

01:47  
to 2015 they involve almost 21 years worth

01:53  
of prophetic writings from astral

01:57  
visions

02:00  
I've been investigated over the years by

02:03  
almost every intelligence agency on the

02:06  
planet for five years I was imprisoned

02:10  
falsely because of my writings so to

02:14  
silence my work the US government hid me

02:18  
away in the bush years after 9/11 which

02:21  
I had exact details of on numerous sites my

02:27  
prophecies could be found at SOLLOG .com

02:30  
Or Prophecies SOLLOG .com

02:35  
once you understand the accuracy

02:39  
of my work and prophecies putting exact

02:42  
dates out there exact locations exact

02:46  
cities exact events you can then all of

02:52  
a sudden decide to take my asteroid

02:55  
warning more seriously now when I first

02:58  
started writing my prophecies in the

03:00  
mid-1990s I would say in interviews

03:05  
radio and website news sites that

03:11  
basically most of mankind was gonna die

03:15  
after 2020 so shortly after 2020 I

03:20  
didn't give an exact date over the years

03:24  
as many different types of problems

03:28  
arose that many humans feared such as

03:31  
y2k and then the may in 2012 I said

03:36  
don't worry about these events the event

03:38  
is after 2020 I then narrowed it down to

03:44  
shortly after 2022 so for years I said

03:48  
20 after 2020 then shortly after 2022

03:53  
and within the last year and a half to

03:58  
two years I've been fixated on a date

04:01  
for various reasons as my website blog

04:05  
explained how I picked that day

04:07  
but the date that's connecting to this

04:10  
vision I have of an asteroid collision

04:13  
with earth being January 20th 2023 so

04:19  
we're not far off from this event if the

04:23  
date comes and goes and no asteroid

04:25  
happens of course many people would say

04:27  
oh so augs inaccurate Oh over 20 years

04:31  
I've been very accurate and if that date

04:35  
is a non-event and let's say it hits a

04:39  
year later or 10 years later

04:42  
sadly the people that said I was off

04:45  
well I was off by a year attending 10

04:48  
years but the event is coming people and

04:53  
I'm doing my best to try to give you a

04:55  
timeframe so you can be in what I call

04:59  
safe zones what is a safe zone a safe

05:02  
zone is a mountain area that I enough so

05:05  
when tsunamis from a striking either the

05:10  
Atlantic or Pacific Ocean hits the

05:14  
thousands of feet high tsunami that such

05:18  
a asteroid strike from a larger

05:20  
asteroids Detroit would it would create

05:23  
will not reach a very high mountain area

05:26  
inland now the wave from a tsunami that

05:30  
would kill all life all human life near

05:33  
the shore it could travel easily 150 to

05:38  
300 miles inland that's how high these

05:40  
tsunamis would be if an asteroid impact

05:44  
hit the ocean and it was large enough

05:46  
and the history of mankind

05:49  
is filled with stories of great floods

05:53  
etc and most likely these events were

05:56  
passed asteroid strikes I mean asteroids

05:59  
are pretty common also recently I

06:02  
released my work the Holocene extinction

06:07  
which is a extinction event that we're

06:12  
actually living in right now so

06:14  
scientists realize that

06:17  
at the end of the last ice age a lot of

06:19  
animals started dying off way before we

06:25  
had the Industrial Age with mass

06:26  
pollution of carbon and automobiles and

06:28  
everything else so an extinction level

06:32  
event has been happening for almost

06:34  
12,000 years now and it's tied to the

06:37  
great cycle of the Milky Way that takes

06:40  
250 million years to complete a orbit of

06:46  
the Milky Way by the earth and its Sun

06:51  
now might be that this area is more

06:53  
prone for asteroid strikes might be this

06:59  
area has different types of

07:02  
gravitational effects on the core of the

07:04  
planet so there's more earthquakes which

07:07  
would create more volcanoes which would

07:09  
change the density of the atmosphere and

07:13  
destroy a lot of life if enough of

07:16  
sulphur got into the atmosphere enough

07:20  
of dust from volcanic volcanic dust

07:23  
blocked out the Sun etc so we're on a

07:27  
dynamic planet and extinction events

07:31  
there's been six major events that's

07:36  
happened since complex life formed on

07:40  
earth about 550 million years ago now if

07:45  
you're one of the scientific minds that

07:49  
understand how much life has has gone

07:52  
extinct in the past 12,000 years since

07:56  
the last ice age you realize we're in

07:58  
the Holocene or the hella senac

08:01  
extinction we wrote a book on you go to

08:04  
hollow sonic calm

08:05  
hol OCE and icy calm and you'll see my

08:10  
work on that my asteroid book is at

08:13  
asteroid moby mo VIII

08:16  
so that's asteroid mo bi for asteroid

08:21  
Mobe and my prophesies are at either

08:25  
solocom soo-ji

08:28  
calm or prophesies solocom my academic

08:32  
work is that solid Oni calm that's Sol a

08:35  
deal and I calm I've written over a

08:38  
hundred books I have a lot of scientific

08:43  
theories out there in math and physics

08:45  
and astrophysics you know I'm a big

08:50  
thinker with this super high IQ so I'm

08:54  
not someone that you should ignore okay

08:59  
I'm very educated very intelligent

09:06  
person who is warning humanity through a

09:10  
series of prophesies I released over 20

09:13  
years to show my accuracy level and it's

09:18  
a small remnant of humans we'll go to

09:21  
high ground now the big problem with

09:25  
this asteroid strike is it hits the

09:28  
ocean tsunamis we're gonna not only wash

09:32  
away anything near the shore it's going

09:35  
to take out hundreds of nuclear reactors

09:37  
that are often positioned along the

09:40  
shores so that's the big tragedy enough

09:47  
of humans inland would survive be no big

09:50  
deal

09:51  
humanity would go on ok but it's these

09:55  
nuclear reactors that there's over 500

09:58  
now on the planet and over half of them

10:01  
are along shorelines that are prone to

10:05  
[Music]

10:06  
tsunamis from asteroid strikes even

10:10  
tsunamis from quakes the Fukushima event

10:14  
in Japan you know I warned of that

10:16  
before that event happened as it look

10:17  
you're gonna see tsunami take out a

10:20  
nuclear power plant I said watch the

10:22  
date 1 1 3 and I explained 1 1 3 could

10:25  
also be 3:11 March 11th so in my

10:28  
prophecies you know I have the date the

10:31  
location the event bang you know it hit

10:34  
you put my work together and you can see

10:37  
that that event was clearly for time

10:40  
told by me and it's created havoc on the

10:45  
Pacific Pacific Ocean I mean the way

10:51  
it's killed off and mutated all kinds of

10:54  
life in the Pacific Ocean and that's

10:57  
just one meltdown from a tsunami now

11:03  
imagine if we had 150 or 250

11:07  
Fukushima's at once do you really think

11:11  
any life on this planet would survive

11:13  
that the radiation would eventually kill

11:16  
off all life above a few types of

11:19  
insects that might be able to survive

11:21  
such radiation anything with lungs

11:25  
that's you know got warm blood and isn't

11:30  
an insect I don't think it's gonna

11:32  
survive the radiation levels that you

11:37  
know two or three hundred Fukushima's

11:40  
would create so that's the problem

11:43  
people the asteroid is tied to

11:47  
catastrophic events with nuclear

11:50  
reactors that are prone to tsunamis from

11:54  
asteroid strikes and also quakes so we

11:58  
only have a few years to really start

12:01  
turning off these reactors and getting

12:03  
the waste to higher ground where you

12:06  
know the waste will not be impacted by

12:11  
tsunamis so all of humanity now has a

12:14  
huge chore ahead of it will humanity

12:19  
start to work together and fix this I

12:21  
seriously doubt with people the older I

12:24  
get the less hope I have for Humanity

12:26  
it's a sad truth but Humanity is heading

12:31  
in the wrong direction I feel sorry for

12:36  
the kids being born to that grow up with

12:39  
all this technology that keeps them from

12:41  
enjoying life outside meeting people

12:43  
making friends I mean this social web

12:47  
we've created with thus internet is just

12:51  
dehumanizing

12:52  
and it's turning people into vicious

12:55  
online Psychopaths that just wanna

13:00  
attack and bully and harass anyone was

13:05  
trying to help humanity so read these

13:10  
books go to these sites most of the

13:12  
information is free all my prophecies

13:15  
over the years were released free to use

13:17  
that they all have time stamps anyone

13:20  
with that IQ above you know 80 can see

13:23  
the time stamps realize you can't

13:25  
manipulate them restore it in u s-- net

13:27  
which is you know network of all the

13:30  
world's computers so you know you can't

13:33  
fake timestamps and Usian i mean it's

13:36  
the most accurate way to document a date

13:40  
of something is to put it into u s-- net

13:42  
my prophecies were all put from 1995

13:46  
till the beginning of 2016

13:48  
into u s-- net so there's timestamps

13:51  
people after 2010 my prophecies until

13:56  
2016 we're all put in videos on youtube

14:00  
as well the timestamps YouTube is owned

14:04  
by Google no one can manipulate the

14:05  
timestamps there so my work was done for

14:08  
a reason people was to show you that I

14:12  
know exact details of the future so I

14:18  
know an asteroid strike is in the

14:21  
imminent future it's happened many times

14:23  
in the past I mean it's a pretty common

14:25  
event the only difference is this time

14:28  
we have nuclear reactors that could melt

14:31  
down and create radiation that will

14:35  
destroy all intelligent life on this

14:37  
planet so that's the problem

14:40  
little man humanity address it and start

14:44  
turning off nuclear reactors well you

14:47  
know ten years ago I formed grapa which

14:50  
is the global renewable energy

14:52  
production agreement and now some

14:55  
politicians are starting to present

14:58  
ideas that are compatible with krepo

15:02  
like the young senator from New York

15:05  
the female Alexandria Ocasio Cortez

15:10  
her green deal it's very aligned to the

15:15  
principles of grep not org when I put

15:18  
out over a decade ago

15:20  
so if enough of politicians started

15:27  
getting on the electrical grids away

15:31  
from nuclear reactors and putting the

15:35  
waste in safe areas away from oceans and

15:40  
earthquake prone faults humanity could

15:45  
survive to some degree an asteroid

15:48  
strike most of humanity would die in

15:51  
such an event but it's the idea that

15:54  
even if a fraction 0.1 percent one out

15:58  
of a thousand humans could survive

16:00  
because we clean up this nuclear mess

16:04  
that is sitting there like a time bomb

16:07  
waiting for tsunamis then there could be

16:10  
a future but closer we get to 2023 the

16:16  
more I believe there is no future on

16:19  
this planet I mean futures all over the

16:22  
universe universe is a huge place and

16:27  
the more physics is starting to realize

16:32  
that reality may very well be just an

16:36  
illusion a holographic reality which is

16:39  
what I said

16:40  
you know in the mid-70s I was young

16:43  
cater to think-tank i theorize six and

16:45  
ten dimensional computer languages using

16:50  
a cube bite and a decagon bite well man

16:53  
hasn't invented the processors for what

16:55  
I had in my head as a teenager but if we

16:59  
ever did create cube bites and decagon

17:03  
bites those machines would have six and

17:05  
ten dimensional

17:08  
realities within them so third

17:10  
dimensional human past president of

17:14  
future or 3d height width and depth

17:20  
perception could exist easily inside the

17:23  
6 or 10 dimensional processor so you

17:29  
know the whole thing comes down to we

17:33  
are now becoming very aware of things in

17:36  
the universe that are rewriting the laws

17:41  
of physics Newton Einstein Hawking you

17:45  
know these people have all been proven

17:47  
wrong recently when I released what's

17:50  
known as theory II period or shows

17:54  
Newton was wrong about mass attracting

17:57  
mass mass of gas does not attract to the

18:02  
huge mass of Earth it's a fact so that

18:06  
alone proves Newton's universal law is

18:11  
wrong Einstein's work it's just a simple

18:14  
math rule and the whole thing is

18:17  
Einstein didn't even create his famous

18:20  
formula it was around for a few years

18:21  
with other physicists that already had

18:24  
put forth papers you know with the same

18:27  
concept mass being energy so if you

18:31  
really understand the math it all comes

18:33  
down to it's a simple math loop it's

18:35  
like a trick and it's actually pretty

18:38  
funny that so many people fell for our

18:40  
science joke all these years then we

18:45  
have Hawking you know with his idea that

18:47  
you know Hawking radiation

18:49  
you know what black holes really are and

18:52  
how they're devouring everything for no

18:55  
such thing as a black hole what is being

18:59  
called a black hole is actually a field

19:01  
it's an anti electromagnetic field

19:05  
that's at the center of almost every

19:10  
universe II and what these are fields

19:14  
that break down and recycle matter

19:17  
energy back into two basic forms so

19:20  
we've already witnessed being repelled

19:23  
from then horizon of what we now call

19:28  
black holes matter matter is being

19:31  
repelled is the basic matter in the

19:34  
universe protons so if protons don't get

19:37  
sucked into a black hole well they're

19:40  
being repelled

19:41  
are they being repelled because more

19:43  
complex matter that approaches a field

19:47  
of the black hole is being broken down

19:51  
and recycled into protons the energy

19:54  
that approaches these black holes owns

19:56  
is being recycled into plasma so we see

20:00  
plasma being emitted from black hole

20:02  
fields so theory is right and it

20:07  
completely destroys Newton Einstein

20:09  
Hawking and it validates a computer

20:14  
universe theory holographic universe

20:16  
theory my work holographic universe is

20:19  
calm its holographic universe is plural

20:23  
calm you know is basically a

20:27  
presentation of what I their eyes din

20:30  
the 70s our realities is just part of a

20:35  
complex AI level computer

20:39  
so we're sentient beings inside this

20:42  
simulation and simulation is pointing to

20:46  
hey you're in an area where you're very

20:50  
likely to get a huge asteroid stroke

20:52  
strike so now are you gonna fix your

20:56  
nuclear reactors and survive or are you

20:58  
gonna let all life go extinct that's

20:59  
what the simulations about well humanity

21:02  
rise to the level to save this planet

21:06  
because if we have these nuclear

21:09  
reactors and they all meltdown from

21:11  
tsunamis from asteroids well forget

21:14  
about it it's over nothing's gonna

21:15  
survive oh yeah they'll be a few years

21:18  
where life adjusts to high levels of

21:21  
radiation but the radiation is gonna be

21:23  
so intense that

21:27  
reproductions in a stop and within a

21:31  
generation or two intelligent life will

21:34  
be God so early in my prophetic career I

21:40  
used to talk about the safe zones and

21:43  
the safe zones still exist but how long

21:46  
they're gonna exist asked after an

21:48  
asteroid strike well they're not gonna

21:50  
exist very long if we don't clean up

21:53  
this nuclear mess so that's the problem

21:55  
even the safe zones there are only

21:57  
temporary safe zones it's it's all these

22:01  
nuclear reactors are gonna melt down and

22:04  
that's what my message in this podcast

22:07  
is about it's about look asteroid

22:11  
strikes happen we can't have nuclear

22:14  
reactors were tsunamis from an asteroid

22:17  
tsunami I mean these asteroids create

22:22  
thousands of feet highways they wash

22:25  
ashore you know 150 to 300 miles inland

22:28  
you could be on a mountain in the

22:30  
Appalachians in North America and it

22:33  
might still get washed over that's how

22:36  
powerful these waves are you know the

22:39  
oceans are deep so when a massive object

22:43  
strikes an ocean at a high speed the the

22:48  
wave is humongous and it ripples around

22:50  
the world so you go to my side asteroid

22:56  
Mobi read what I have to say watch the

22:59  
videos download my book go start looking

23:04  
at my prophecies and seeing how the

23:08  
timestamps prove I put a lot of details

23:11  
about the future out there my only hope

23:13  
is maybe some of you get it and start

23:15  
doing things to get these reactors

23:18  
turned off so we can survive that's what

23:21  
my message is about trying to get

23:23  
humanity to get rid of nuclear

23:25  
technology so

23:28  
we are not destroyed by our own

23:32  
technology which could affect all life

23:35  
on this planet sites you need to go to

23:40  
is salah calm sol OG my academic work is

23:44  
that solid oni calm sol a deal and i

23:47  
calm asteroid information is that

23:51  
asteroid op mo v mo bi my holographic

23:57  
universe work is at holographic

24:00  
universes word universe plural universes

24:03  
calm start researching people realize

24:09  
that I'm very accurate at what I do and

24:14  
I've suffered a lot at the hands of the

24:17  
government they wanted to silence me

24:18  
after 9/11 because exact details of that

24:21  
tragedy were on my event well I also

24:24  
nail locations of earthquakes and

24:26  
hurricanes that everything else so I

24:29  
have no connection to terrorists but

24:32  
acts of God happened when and where I

24:34  
say it's called the Prophet people and

24:38  
in this day and age when humans are so

24:42  
far away from their spiritual reality of

24:44  
what they are and who they are you know

24:47  
words like prophet you know most people

24:49  
don't like so guess what most people

24:52  
stay in areas that are gonna get washed

24:55  
away my only hope is that the people

24:59  
that are up in the high mountain areas

25:00  
can survive because the nuclear reactors

25:03  
were turned off you know Buddhism this

25:06  
was called the age of Mapo cleanup time

25:09  
Jojo the great Buddhist seer was

25:13  
supposed to come oh when I woke up in

25:15  
Buddhism you know over 30 years ago 35

25:19  
years ago as a young man I awoken to the

25:23  
name Jogyo fulfilling Buddhist Scripture

25:28  
then I awoken 25 years ago as SOLLOG

25:32  
fulfilling more prophecies so we're in a

25:37  
prophetic simulation

25:39  
and modern humans could care less about

25:42  
profits they're lost in their miserable

25:46  
lives taking drugs and pills and booze

25:50  
and doing all kinds of sexual things to

25:57  
lose their ability to do serious

26:04  
contemplation about you know why is

26:07  
intelligent life exists you know very

26:10  
few people have deep thoughts on this

26:12  
planet and that's what this planet was

26:14  
created for it so that people could grow

26:16  
a spiritual truth within them and

26:21  
everyone's just here for a pleasure zone

26:23  
it's the instinct gratification era

26:27  
people just want instant happiness

26:32  
instant approval

26:34  
instant success instant whatever oh it's

26:39  
all gonna be wiped out soon the

26:40  
asteroids coming go to asteroid a movie

26:44  
and try to spread this message in social

26:47  
media this is SOLLOG S O L L O G .com and I'm

26:52  
the host of thee end you can hear more of

26:54  
my podcast at thee end com that's th EE

26:59  
and then e ND so there's three e's in

27:03  
thee end com this is SOLLOG and have a

27:07  
great day

27:12  
[Music]

27:23  
The End is very near lost all you hold dear you

27:31  
didn't want to hear now you tremble with

27:36  
fear

27:38  
[Music]
